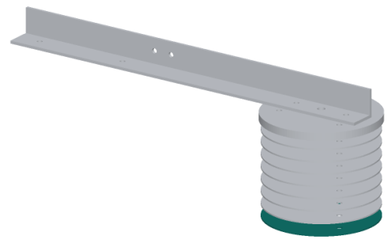
**RIGHT VIEW**

Scale 1:2; looking at the right side (along -X)



**WHERE IT GOES**

This part in colour, its neighbours in grey

**HOW TO MAKE IT AND HOW IT FITS**

Make eight. Ring 120 outside, 56 inside, 1.5 thick, printed flat.
Three 5.5 mm holes on an 84 mm circle, 120 degrees apart; one of them on the line from the centre toward the pole.
White plastic reflects the sun; do not paint or use another colour.
Make 24 spacers too: 8 mm outside, 5.5 mm bore, 21 of them 11.5 long and 3 of them 9.25 long (the top row, under the cap).
Stack: plate, 11.5 spacer, plate ... 8 plates, then the short spacers and the cap, all on three M5 rods, 13 mm from plate to plate.
Check: the stack is 13 mm pitch, plates parallel, gaps open.
